## HD20 Hat & Coat Hanger Mounting Instructions

Choose location for hanger. Drive screws into wall positioned as illustrated in Fig. A & Fig B. using a Phillips screwdriver. If a wall stud is not found, these pilot holes are necessary for installing the drywall anchors. To do this, use the screwdriver to push the tip of the anchor into the pilot holes and turn the anchor clockwise until flush. Remount hanger with screw into anchor. DO NOT REUSE ANCHORS.
